Screenshots iPhone iPad

Description

'Le bonheur de lire' offers a fun and catchy gameplay. The child is immersed in a small village where cute animals invite him to learn how to read French words. A visit in the store allows him to select the next word to play with. Exercises are chosen by an artificial intelligence. The more you play, the more it is difficult. It is also possible to give to the child words that he is asking for through a dynamic recording system.

After a series of challenges summarized in a progress bar, a gold coin is given to buy the next word. It is also possible to improve the learning experience by directly accessing the exercises from the menu, or by clicking on the chest that stores all collected words...
